SUMMARY

Frontend Engineer with experience designing and building scalable web applications and AI-powered products. Proficient in **React, Next.js, TypeScript, Vue, Electron, and modern frontend architecture**, with hands-on experience integrating **LLMs** including **Anthropic Claude, Ollama, OpenAI Codex, and AI APIs** into production applications. Skilled in building intuitive user interfaces, architecting frontend systems, consuming REST APIs, and collaborating across engineering teams. Passionate about creating performant, user-centric products and leveraging AI to solve real-world problems.

WORK EXPERIENCE

Geodel, Engineering Lead

2026 | remote

- architecting the full stack for Geodel's AI-powered subsurface intelligence platform, using Next.js, Supabase, and Plotly.js to convert geophysical (ERT) survey data into decision-ready models and risk interpretations.
- integrated Anthropic Claude API and Ollama for AI-driven geological analysis, and designed the Supabase backend for authentication, data persistence, and analysis retrieval.
- Developed interactive time-lapse visualizations and diagnosed a major performance bottleneck in large-file uploads, cutting backend payload size by moving summarization to the client.

wazi HR, Frontend Team Lead

2025 – 2026

- Led frontend development and built the entire frontend and three role-based dashboards for WaziHR (www.wazihr.com 🔗), an all-in-one HR, Payroll, and ERP suite, using Next.js, Tailwind CSS, **TanStack** and supporting libraries.
- Developed a large library of reusable components for Employee, Company, and Core Team views.
- Implemented key modules including personnel management, payroll automation, leave & attendance, performance, recruitment, and self-service portals.
- Built the Core Team dashboard for full system monitoring, access control, and security analysis.

soval Lab, Frontend Engineer (contract)

2026 | remote

- Part of the team that built a loan management and monitoring platform for a Nigerian bank, enabling tracking, analysis, and evaluation of disbursements, repayments, and beneficiaries, using Next.js, Chakra UI, TanStack, and Axios.
- Implemented multiple role-based dashboards spanning the full approval flow, from Executive Directors to Risk Analysts to Checkpoint Officers, each with tailored views and permissions.
- Replicated and adapted the platform architecture for additional loan programs, enabling rapid rollout across multiple initiatives.

GreatercareLead, Frontend Developer (Contract)

03/2025

- Led the frontend development of a telemedicine web app, collaborating with backend and frontend engineers to enable patient-doctor consultations.

- Implemented the design for a management dashboard, supporting admin, doctor, and patient interactions for booking consultations, viewing schedules, managing subscriptions, and processing payments.
- Consumed APIs to facilitate patient booking, consultation views, and subscription tracking.
- Developed the admin dashboard to monitor patient and doctor activities, manage payments, and oversee consultation bookings.

Pashione, *Frontend Engineer*

09/2024 – 02/2025

- Manage and optimize the frontend of a large-scale e-commerce marketplace (pashione.co) using Next.js, TypeScript, and Supabase, adding a product variant display feature and fixing navigation issues.
- Built and maintain the Careers page on the corporate site (corporate.pashione.co) with real-time job updates.
- Developed the Medlitics launch site, adding About Me and FAQ sections, a chatbot, and SEO enhancements.
- Maintain daily responsiveness to client technical needs and improve code performance.

Herrand Ltd., *Team Lead - Frontend Developer*

08/2024 – 03/2025

- Led the rewrite of a dashboard using React, Tailwind CSS, and Firebase to monitor mobile app interactions (signups, agents, transactions), adding finance tracking, admin privileges, and authentication.
- Converted the optimized web dashboard into Windows, Linux, and Mac desktop apps using Electron for marketing team use; handle ongoing updates and issue resolution.
- Revamped Herrand.com with a clean, accessible UI aligned with the company brand.

Trocah, *Frontend Web Developer*

01/2024 – 05/2024

- Collaborated on building the company landing page with TypeScript and Next.js for a fintech platform.
- Contributed to a monitoring dashboard tracking currency exchange data (customer evaluations, volumes, valuations).
- Worked with team to integrate frontend with backend systems under the team lead's guidance.

EDUCATION

Federal University of Petroleum Resources, *Bachelor of Science in Physics*

01/2015 – 01/2019

SKILLS

Languages — HTML, CSS, JavaScript, TypeScript, Sass, jQuery, **Technologies/Tools** — Git, React, Next.js, Tailwind CSS, Chakra-UI, Material UI, Firebase, Electron, Netlify, Postman, Strapi, Supabase, LLM Integration, Anthropic Claude API, Ollama, OpenAI Codex API, Prompt Engineering, AI Workflow Design, AI-assisted Development, **Project Management** — Agile Methodologies, ClickUp, Jira, **Other Skills** — API Integration, Communication, Problem-Solving, SEO,
